

PLEASE ADD THE FOLLOWING NEW CLAIMS:

A2 --10. Method according to claim 2, in which the first station (1), in response to the reception of the second message, transmits a third message to the second station (2) via the said route (23).

11. Method according to claim 2, in which the said first subscriber station (1) is the initiator of the connection (23) to be established and the said second subscriber station (2) is the called station, in which the first payment willingness information has a predetermined first value which is indicative of payment willingness and in which the second payment willingness information has a second value which is different from said predetermined first value.

12. Method according to claim 3, in which the said first subscriber station (1) is the initiator of the connection (23) to be established and the said second subscriber station (2) is the called station, in which the first payment willingness information has a predetermined first value which is indicative of payment willingness and in which the second payment willingness information has a second value which is different from said predetermined first value.

13. Method according to claim 10, in which the said first subscriber station (1) is the initiator of the connection (23) to be established and the said second subscriber station (2) is the called station, in which the first payment willingness information has a predetermined first value which is indicative of payment willingness and in which the second payment willingness information has a second value which is different from said predetermined first value.

14. Method according to claim 2, in which said first subscriber station (1) is initiator of the connection (23) to be established and the said second subscriber station (2) is the

called station, and in which, in the case of "collect call", the second payment willingness information has a predetermined first value which is indicative of payment willingness and the first payment willingness information has a second value which is different from said predetermined first value.

15. Method according to claim 3, in which said first subscriber station (1) is initiator of the connection (23) to be established and the said second subscriber station (2) is the called station, and in which, in the case of "collect call", the second payment willingness information has a predetermined first value which is indicative of payment willingness and the first payment willingness information has a second value which is different from said predetermined first value.

16. Method according to claim 10, in which said first subscriber station (1) is initiator of the connection (23) to be established and the said second subscriber station (2) is the called station, and in which, in the case of "collect call", the second payment willingness information has a predetermined first value which is indicative of payment willingness and the first payment willingness information has a second value which is different from said predetermined first value.

17. Method according to claim 2, in which the said second subscriber station (2) is the initiator of the connection to be established and the said first station (1) is the called station, in which the second payment willingness information has a predetermined first value which is indicative of payment willingness and the first payment willingness information has a second value which is different from the said predetermined first value.

18. Method according to claim 3, in which the said second subscriber station (2) is the initiator of the connection to be established and the said first station (1) is the called station,

in which the second payment willingness information has a predetermined first value which is indicative of payment willingness and the first payment willingness information has a second value which is different from the said predetermined first value.

19. Method according to claim 10, in which the said second subscriber station (2) is the initiator of the connection to be established and the said first station (1) is the called station, in which the second payment willingness information has a predetermined first value which is indicative of payment willingness and the first payment willingness information has a second value which is different from the said predetermined first value.

20. Method according to claim 2, in which the said second subscriber station (2) is the initiator for the connection to be established and the said first subscriber station (1) is the called station, in which, in the case of "collect call", the first payment willingness information has a predetermined first value which is indicative of payment willingness and the second payment willingness information has a second value which is different from said predetermined first value.

21. Method according to claim 3, in which the said second subscriber station (2) is the initiator for the connection to be established and the said first subscriber station (1) is the called station, in which, in the case of "collect call", the first payment willingness information has a predetermined first value which is indicative of payment willingness and the second payment willingness information has a second value which is different from said predetermined first value.

22. Method according to claim 10, in which the said second subscriber station (2) is the initiator for the connection to be established and the said first subscriber station (1) is the
